Experiment information

Content

Please request the following information from the sequencing lab for each sequencing experiment:

experiment_id: This an internal id for your experiment record. It must be unique to one experiment record for a provider. Example is 'e123'. The value must single word.

instrument_model: Example is Illumina.

instrument_model: Example is Illumina MiSeq

library_name: Any library name.

library_layout: PAIRED/ SINGLE

library_strategy: Example is WGS

library_source: Example is GENOMIC

library_selection: Example is RANDOM

insert_size: For paired end reads only. Example is 250.

Format

The accepted format is tab-delimitated file. The first line shall contain the list of keys. From the second line the values for corresponding keys needs to be provided. Each line shall represent one experiment record.

A complete example has been provided in **experiment.txt** file.
